

Ministry of Environment, Climate Change and Environment
Male', Republic of Maldives.

Answers to questions received with reference to Announcement Number (IUL)438-
CCD/438/2023/177 dated 16th April 2023, Consultancy Service for a GHG Inventory Expert

20th April 2023

Please find below answers for clarification for the above bid.

- 1. The numbering of the Indicative Tasks, made me confused. That is, it starts from 1.2.2 then 1.2.4 (there is no 1.2.3). Then abruptly it goes to 1.4.1 (there is no 1.3.***). There is no 1.4.3 also. 1.4.4 is there but below that there is no numbering system. Is it Ok to just forget the numbering and only concentrate on the content given in words or will you give a corrected bidding document?**
The "Activity x.y.z" are CBIT project activity numbers. The indicative tasks of this TOR encompass only those activities for which the GHG inventory expert is responsible for. Therefore, please keep the numbering as is in the TOR.
- 2. List of sectors that need to be considered for the study**
Please refer to reports published by the Ministry in this context, most recently, the Biennial Update report of the Maldives.
- 3. Audience of the training workshop**
National institutions involved in the data collection used in the GHG inventory calculations
- 4. Current capabilities for QA/QC to assess level of training required**
Please refer to reports published by the Ministry in this context, most recently, the Biennial Update report of the Maldives.
- 5. Current Systems available to understand current data availability**
Please refer to reports published by the Ministry in this context, most recently, the Biennial Update report of the Maldives.
