DEVELOPMENT OF A MINAMATA INITIAL ASSESSMENT (MIA) IN THE MALDIVES

TERMS OF REFERNCE FOR MIA CONSULTANT

A. BACKGROUND

The Minamata Convention on Mercury is a global treaty to protect human health and the environment from the adverse effects of mercury. The major highlights of the Convention include a ban on new mercury mines, the phase-out of existing ones, control measures on air emissions, and the international regulation of the informal sector for artisanal and small-scale gold mining.

The project 'Development of a Minamata Initial Assessment in Maldives' will be implemented by the Ministry of Environment and Energy (MEE) in association with United Environment Program (UNEP) through funding received from the Global Environment Facility (GEF).

The project is designed to assist Maldives to ratify and implement Minamata Convention through scientific and technical studies.

B. OBJECTIVES

The objective of this project is facilitation of ratification and early implementation of the Minamata Convention through the use of scientific and technical knowledge and tools by national stakeholders relevant to Mercury management in Maldives.

C. OVERALL RESPONSIBILITY

The overall responsibility of the MIA consultant includes, but is not limited to the following:

- a. Development of Minamata Assessment to guide ratification and early implementation of the Minamata Convention in the Maldives.

Green Building, Handhuvaree Hingun,
Maafannu, Male', 20392, Republic of Maldives.

D. SCOPE OF WORKS

The scope of works to be undertaken by the individual/expert under this outlined Terms of Reference are to be undertaken in close collaboration with the Environment Department, and relevant stakeholders as necessary, and include, but are not necessarily limited to, the following:

1. Conduct and compile a national assessment on existing sources of information
2. Identify and assess key national stakeholders, their roles in mercury management and institutional interest and capacities.
3. Analyze the regulatory framework, identify gaps and assess the regulatory reforms needed for the sound management of mercury in the Maldives using NRDC checklist (this document will be provided).
4. Develop a qualitative and quantitative inventory of all mercury sources and releases in the Maldives using UNEP toolkit for identification and quantification of Mercury Releases.
5. Develop a national strategy to identify mercury contaminated sites.
6. Conduct a national assessment on challenges and opportunities to implement the convention in key priority sectors.
7. Develop a report on recommendations to implement the Minamata Convention on mercury.
8. Draft and validate Minamata Assessment Report (MIA). The final MIA report is to be formatted according to the IOMC template (this document will be provided).

E. QUALIFICATIONS AND EXPERIENCE

1. Must have minimum tertiary qualification in Environmental Management/Environmental Science/Environmental Engineering or related discipline
2. Must have professional work experience in the field of Environment management or environmental data management / waste management of at least 7 (seven) years
3. Previous experience in undertaking mercury studies/research will be inventory will be

an added advantage

4. Experience in donor assisted development projects along with understanding of technical, commercial and legal aspects of procurement of donor assisted projects will be an added advantage
5. Experience in international conventions related to chemicals and hazardous waste will be an added advantage
6. Familiarity with the Minamata Convention, and environmental policies and regulations is an asset
7. Should have strong leadership, management and communication skills in presenting, discussing and resolving difficult issues and have ability to work efficiently and effectively with a multidisciplinary team.

Applicants are required to submit a portfolio of similar work done (reference letters or any documental proof of developed applications for organizations).

The successful candidate will be given one day training on Mercury inventory tool kit for identification and quantification of mercury releases developed by UNEP.

F. DELIVERABLES
