**INTRODUCTION AND BACKGROUND**

The Government of Maldives, with support from the Global Environment Facility (GEF) and oversight by the United Nations Development Programme (UNDP), is implementing the project “Eliminating Persistent Organic Pollutants through Sound Management of Chemicals” (POPs Project). As part of this initiative, an interim hazardous waste storage facility is proposed at the Raa Vandhoo Regional Waste Management Facility (RWMF) to address the critical gap in hazardous waste management.

The Maldives faces growing challenges in safely managing hazardous chemicals and waste, including Persistent Organic Pollutants (POPs), e-waste, and other hazardous materials. These materials have been accumulating without proper disposal or treatment mechanisms. The Waste Management Regulation prohibits open burning and uncontrolled dumping of hazardous waste, underscoring the urgent need for efficient and safe waste management systems.

The proposed interim facility will:

- Serve as a centralized hub for the receipt, temporary storage, and preparation of hazardous waste for environmentally sound disposal abroad.
- Leverage the existing infrastructure at the RWMF, originally established under the Maldives Environmental Management Project (MEMP), which has undergone upgrades and Environmental and Social Impact Assessments (ESIA) in 2012, 2019, and subsequent years.

**OBJECTIVE**

This TOR aims to engage a consultant to develop an ESIA for the interim facility in compliance with national and international standards, including those of the Maldives Environmental Protection Agency (EPA), the GEF, UNDP, and the World Bank.

Note: The proposed project for establishing a Hazardous Waste Storage Facility will be classified as an associated facility under Environmental and Social Standard 1 (ESS1) of the World Bank Financed Maldives Clean Environment Project (MCEP) and the upgrade works currently being implemented at the Vandhoo Regional Waste Management Facility (RWMF). Accordingly, the World Bank's safeguard requirements will apply in full to the proposed facility.

These requirements must be taken into account during the development of the Environmental and Social Impact Assessment (ESIA). This includes, but is not limited to, obtaining the approval of the Technical Terms of Reference (TOR) and the ESIA from the World Bank and all other relevant agencies as outlined in this TOR.

**SCOPE OF ASSIGNMENT**

The consultant will undertake the following tasks to prepare the ESIA, ensuring alignment with all applicable regulatory and safeguard requirements:

**Key Activities:**

1. **Technical Terms of Reference:** The consultant shall prepare a detailed technical Terms of Reference (TOR), covering all aspects of the study, in accordance with the requirements of the Environmental Impact Assessment (EIA) Regulations of the Maldives and the UNDP and World Bank's Environmental and Social Safeguards Policies. The draft TOR shall be finalized after incorporating feedback received from stakeholders during the scoping exercise, as well as comments from EPA, UNDP, POPs PMU, MCEP and the World Bank.
2. **Project Description:** Provide a detailed description of the proposed interim hazardous waste storage facility, including site layout, infrastructure components, and operational activities. The operational activities shall be clearly laid out, indicating the specific types of hazardous waste and estimated quantity that will be brought, how it will be received at the RWMF island (details of containers, sea transfer vessels and at what frequency), weighed, and transferred from the harbour to the storage facility. A process flow diagram shall be provided clearly indicating the transfer routes. Spillage prevention and occupational health and safety aspects shall be considered. An indicative fire safety and evacuation plan shall also be included.
3. **Baseline Environmental and Social Conditions:** Assess and document the current physical, biological, and socio-economic conditions of the project site and surrounding areas. This shall include, but not limited to, Groundwater Quality, Soil Condition, Vegetation Cover, Noise, and Air Quality at the Project Site, Environmentally Sensitive Sites (Vegetation Buffer, Turtle Nesting Beach, Mangrove area etc.) Hazard Vulnerability and Areas of Historical and Cultural Significance.
4. **Regulatory and Policy Framework:** Identify and outline relevant national regulations, international conventions, and safeguard standards applicable to the project.
5. **Analysis of Alternatives:** Evaluate and compare alternatives for project location, design, and operation, including the "no project" scenario.
6. **Impact Assessment:** Identify potential environmental and social impacts across all project phases (planning, construction, and operation).
7. **Mitigation Measures:** Propose measures to prevent, minimize, or offset adverse impacts including measures to prevent impacts on the turtle nesting beach in R Vandhoo.
8. **Environmental and Social Management Plan (ESMP):** Develop a detailed plan outlining mitigation measure, monitoring protocols, and roles and responsibilities for ESMP implementation.
9. **Contingency Planning:** Outline measures for emergency preparedness and response.
10. **Monitoring and Reporting:** Propose a framework for monitoring project impacts and compliance, including indicators and reporting mechanisms.
11. **Stakeholder Engagement and Grievance Mechanism:** Conduct stakeholder consultations and establish a mechanism for addressing grievances. Waste Management Cooperation Limited, Waste Management and Pollution Control Department (WMPCD) of MCCEE including representatives of MCEP and other donor financed projects that are investing in Vandhoo RWMF, Utility Regulatory Authority (URA), the EPA and MNDF's fire and rescue services shall be consulted at the minimum.
